Index for The Computer Journal, Volume 31

1. Index of titles of Papers, etc

Access Path Selection in Databases with Intelligent Disc Subsystems 41
Adaptive Grid for Polyhedral Visibility in Object Space: an Implementation 56
Advanced Problem-oriented Introduction to Imperative Programming with Modula-2, An 531
Algebraic Transformation Techniques for Functional Languages 229
Analysis of a Modified Address Calculation Sorting Algorithm 561
Analysis of Comparison-based Diagnosable Systems using Temporal Criteria 201
Analysis of Reliability Models for Interconnecting MIMD Systems 304
Announcements 93, 140, 154, 164, 174, 189, 190, 200, 208, 242, 275, 286, 312, 357, 363, 380, 476, 502, 516, 573
Applications of a Subset-Generating Algorithm to Base Enumeration, Knapsack and Minimal Covering Problems 65
Approach to Handling Incomplete Information in Databases, An 133
Approximate Modelling of Cognitive Activity with an Expert System: A Theory-Based Strategy for Developing an Interactive Design Tool 445
Are 'Human Factors' Human? 386

Binding and Type Checking in Database Programming Languages 99

Closure Properties of Certain Classes of Languages under Generalized Morphic Replication 325
Clustering Related Tuples in Databases 253
Comparing Conceptual Models and Data Flow Diagrams 376
Comparison and Extension of Theories of Zipf and Halstead 248
Computer-Assisted Mathematical Programming (Modelling) System: CAMPS 364
Concurrent Maintenance of Data Structures in a Distributed Environment 165
Controlling the Dependency of User Access Control Mechanisms on Correctness of User Identification 503
Correspondence 92, 190, 286, 380

Data Dictionary Approach to Teaching Information Systems Analysis, A 182
Detecting Plagiarism in Student Pascal Programs 1
Dictionary Machine with Improved Performance 490
Distributed Algorithm for Mutual Exclusion in an Arbitrary Network, A 289
Distributed Directory Database System for Telecommunications, A 175

Editorial 97, 385
Efficient Implementation of Binary Trees in LISP Systems 330
Efficient Implementation of Detection of Undefined Variables 545
Employing Usability Engineering in the Development of Office Products 431
Enhanced Address Resolution in a Multi-LAN Ethernet Communications System 296
Experience with Adaptive Interfaces 465
Experiment in Clock Synchronisation, An 496
Experimental Study of CODASYL Database Administration at the Secondary Storage Level, The 344

Fast Algorithm for Generating Set Partitions, A 283
Fast Implementation of Relational Operations Via Inverse Projections 147
Formal Specification of the QMC Message System: The Underlying Abstract Model, A 313
From Entity-relationship Diagrams to Fourth Normal Form: A Pictorial Aid to Analysis 258
Functional Database Constraints 336

Goblin Quadtree, The 358

Higher-order Transformations and Type Simulations 517
Human-Computer Interface Recording 437

Implementation of the Exegesis System, The 125
Improved Matrix Product Computation using Double-Pipeline Systolic Arrays 567
Individual and Organisational Factors and the Design of IPSEs 391
Information Systems and User Resistance: Theory and Practice 398
Information Systems Development: A tool kit is not enough 379
Iterative Tree Traversal using Refinements and Pointer Rotation 269

Judicial Understanding of Information Technology: The Case of the Wombat ROMs 25

Knowledge Acquisition from Technical Texts using Attribute Grammars 525

Medium Access Control Schemes for Local Area Networks with Multiple Priority Function 209
Merging by Decomposition Revisted 553
Metric Space-based Test-data Adequacy Criteria 17
Minimum Diameter of Diregular Digraphs of Degree 2 71
Multidimensional Approach to the Measurement of Human-Computer Performance, A 409

Nondeterminism with Referential Transparency in Functional Programming Languages 243
Notices 96, 192, 382

Object-Oriented Data Model for Database Modelling, Implementation and Access, An 116
On the Role of Ambiguity and Incompleteness in the Design of Decision Tables and Rule-Based Systems 481
On the Worst-Possible Analysis of Weighted Comparison-Based Algorithms 276
On Using an Abstract Model of Distributed Database Concurrency Control Methods 570
Overlay Clusters for C Programs 285

P-compressed Quadtrees for Image Storing 353
Perlog: A Prolog with Persistence and Modules 110
Polygon Join Dependencies, Closed Co-relationship Chains and the Connection Trap in Relational Databases 141
Programming with Generators 220

Query Processing Algorithm for Distributed Relational Database Systems, A 34
Query Translation Based on Hypergraph Models 155

Reading From Paper versus Reading From Screen 457
Recursive Performance Formula of the Disc Modulo Allocation Method for Binary Cartesian Product Files, A 565

Safe Browsing in a Strongly Typed Persistent Environment 540
Simple Algorithm for Generating Non-regular Trees in Lexicographic Order, A 61
Smooth Reshuffling Algorithm for Solving the Bulterman's Problem, A 557
Software Base for Environmental Studies, A 550
Some Applications of Continuations 9
Some Properties of the Rotation Lattice of Binary Trees 564
Split Vertices in Vertex Colouring and Their Application in Developing a Solution to the Faculty Timetable Problem 76
Structured Abstract Schematics 193
Supplier's Role in the Design of Products for Organisations, The 426

Test Procedures for Measurement of Floating-Point Characteristics of Computing Environments 12
Top-down Inference Procedure for Template Dependencies, A 51
Two Livelock-free Protocols for Slotted Rings 474

Unification of Systolic Differencing Algorithms, The 83
Unstable linear time O(1) space merging 279
Use of Prototyping and Simulation in the Development of Large-Scale Applications, The 420

VDM: Axiomatising its Propositional Logic 510
